-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1745

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 4, 5, 8, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by JP-9063612. ('612)

Reference is made to the English language abstract of '612. The UV sterilization apparatus 41 as seen in the drawings of '612 sterilizes microbes in the cooling water circulating system 10, which system corresponds to the claimed fluid circulation line. The system 10 circulates fluid through the fuel cell 1 as seen in '612. The claimed detector is met by a person overseeing the fuel cell power generating apparatus in the '612 patent.

3. The following is an examiner's statement of reasons for allowance: none of the prior art of record teach the claimed fuel cell including a moistening fluid that is present in the fluid that moistens either the fuel gas or the oxidizing gas that is fed into the fuel cell, which fluid is part of a circulation line that has a microorganism inhibiting unit located therein that executes sterilization of microorganisms present in the fluid. The prior art also does not disclose the unit including a dual power UV detector nor a unit where the sterilization is executed in dependence on surplus power of the fuel cell system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
